

### Step 3: My Goals:

**Write down your income goals for your Internet business. Make sure your time commitment and income goals are achievable and realistic.**

1. **Set your goals.** You fulfill your dreams through your goals.

*"The reason most people never reach their goals is that they don't define them, or ever seriously consider them as believable or achievable. Winners can tell you where they are going, what they plan to do along the way, and who will be sharing the adventure with them." - Denis Watley*

Writing your Internet business plan is a personal matter. No one can set your dreams or goals for you. It is up to you to decide which level of success you want to take your Internet business. Set your goals for the next three months, six months, twelve months, two years and five years. What you hope to accomplish in your Internet business must be realistic, achievable, and quantifiable.

## Time Plan

**Create your time plan.** Time management is very important when you write your Internet business plan. The practical way is to manage the use of your time by scheduling blocks of time for every action that you must perform and complete each day for your Internet business. You must focus on your planned actions. You must not be distracted by activities that do not contribute profitably to your goal of making money on-line.

## **Step 5: Take Action.**

Just do it! No excuses! Carry out what you have written in your Internet business plan. Be committed, consistent and persistent. Also, be patient and build your Internet business step-by-step. Believe in yourself and believe you can do something to change your present situation. Taking positive actions and developing profitable habits will make your dreams come true. Your Internet business plan is the compass that points you the way to success. And success is just the progressive realization of your dreams because of the actions you take to achieve your goals.

Your opportunity for success in your home-based business is absolutely possible if you carry out this simple and practical Internet business plan that you have just created. All you need to do is to visualize why you get involved with your Internet business, decide what you want, aim for realistic targets, plan your actions, and work your plan.

Remember, an Internet business plan is not static. It is dynamic and need to be reviewed and tweaked regularly to meet new goals you have set according to your current situation. You must also constantly fine-tune your Internet business plan to reflect the needs of an ever-changing Internet environment.

To your success,
