by Alvin Chung

Finally, Ewen Chia's [Working From Home Secret Report](#) is out. The good news is that it's not difficult to make real money on-line working from home if you take the correct action. From the mouth of the Super Affiliate Ewen Chia himself, “ You can make big money fast on the Internet, but you have to know what you're doing!”

Most people know that you can't “get rich quick” because working from home and making money on-line need some effort and money. You have to grow your Internet business step-by-step and to build wealth slowly and consistently. Ewen argues that the right way to make money on the Internet involves four stages. They are:

Stage 1 – Start! And take action. If you do nothing, nothing happened.

Stage 2 – Get regular cash coming in to act as a platform for your business future growth.

Stage 3 – Grow the monthly income number. When you see consistent monthly cash, reinvest and make it bigger.

Stage 4 – Automate, and repeat. When you have serious money coming in every month, you reduce the work you do to keep that money flowing. Then, you repeat the process to create additional Internet income streams.
